

MN Cohort 4 Positive Community Norms Student Survey 2022

--- Forest Lake (Combined with ALC) ---

Descriptive Statistical Report

The results presented in this report are based on the Minnesota Cohort 4 Positive Community Norms Student Survey administered in February, 2023. This report was funded by MN DHS BHDH through the PCN grant.

Response Count:

	Number of Responses	Total Number of Students	Response Rate	Margin of Error	Number Opted Out
Middle	696	942	73.9%	2%	0
High	1149	2091	54.9%	2%	14
TOTAL	1845	3033	60.8%	1%	14

Note: The Margin of Error is calculated based on the total number of students and sample size (number of responses). As the name implies, the margin of error is a range of values above and below the actual results from a survey. For example, a 60% “yes” response with a margin of error of 5% means that between 55% and 65% of students thinks that the answer is “yes. We used a 95% confidence level to estimate margin of error.
