

MN Cohort 4 Positive Community Norms School Staff & Teacher Survey 2022

--- Forest Lake ---

Descriptive Statistical Report

The results presented in this report are based on the 2022 Minnesota Cohort 4 Positive Community Norms School Staff & Teacher Survey administered November and December of 2022. This report was funded by MN DHS BHDH through the PCN grant.

Response Count:

Community	Number of Responses	Total Number of Teachers and Staff	Response Rate	Margin of Error
Forest Lake	178	240	74.2%	4%

Note: Population size was estimated as the total number of teachers and staff in the community middle and high school. The Margin of Error is calculated based off the population and sample size (number of responses). As the name implies, the margin of error is a range of values above and below the actual results from a survey. For example, a 60% “yes” response with a margin of error of 5% means that between 55% and 65% of the population thinks that the answer is “yes. We used a 95% confidence level to estimate margin of error.
